EXPERIENCE

Frontend engineer   *Sep. 2024 – Current*
Fortuneo

- Designed and developed custom content blocks for the Editorial team to structure and enhance the corporate website.
- Developed UI extensions on Contentful, enhancing the content management experience and addressing specific team requirements.
- Redesigned the showcase website, implementing advanced animations (GSAP) and interactive 3D elements to improve both visual appeal and user engagement.

Frontend engineer   *Jan. 2024 – May 2024*
Hopserve

- Created a CSPM, a tool to analyze and make sure AWS or Azure infrastructures are secure and check their compliance for frameworks like HIPAA, PCI DSS, etc
- Created an SDK tool to review front-end PR's through pinned comments and screenshots

Frontend engineer   *Mar. 2021 – Dec. 2023*
Dreem

- Maintained and upgraded an internal tool used to list and display Dreem headband signals (EEG and accelerometer) to sell to researchers and pharma groups
- Created and led an enrollment (as sales tunnel) for Dreem's digital Sleep Clinic (DreemHealth): series of questions about patient sleep, presentation of the clinic, appointment and complementary questions
- Created a back-office to get all patients data from enrollment and also from Sleep Plan, the mobile app for patients in the clinic
- Created a series of satisfaction surveys for patients of the sleep clinic
- Created corporate websites dreem.com 🪦 and dreemhealth.com
- Led all front-end projects and ensured a technical referent role for a junior front-end developer

Fullstack developer   *Sep. 2019 – Feb. 2021*
Défipix by Sismik

- Created a flow to rent a photobooth taking into account all technical constraints: Booth type, delivery, options, installation, payment, invoice, etc
- Created a dashboard to follow rentals with basic CRUD operations
- Created payment links
